About Me

I am a Business Analyst / IT Consultant with 10 years of experience in banking and financial services, working across retail banking, digital banking, consumer finance, and capital markets.

I work closely with business stakeholders, internal clients, vendors, and IT teams to clarify needs, align expectations, and support practical decisions. I am known for clear communication, structured facilitation, and confident presentations across requirements, UAT, and go-live in regulated environments.

WORK EXPERIENCE

BA Experience – Banking & Financial Services

Cross-functional Banking Programs 2016 – 2023

- (Asia Commercial Bank, GFT Technologies, FE Credit, JACCS Finance, N2N-AFE)
- Business Analyst roles across multiple banking organisations and delivery models.
- Worked in settings requiring regular interaction with business, IT, and vendor teams.
- Experience spanning core banking, digital banking, compliance, and capital markets systems.

Selected Banking & Finance Roles

Asia Commercial Bank (ACB) – Business Analyst
Asset Valuation & Collateral Appraisal Systems

- Worked directly with business users to clarify requirements for asset valuation and collateral appraisal.
- Clarified business rules and system behaviour through structured discussions and scenario-based analysis.
- Translated business requirements into clear functional specifications aligned with IT teams and vendors.
- Explained impacts, acceptance criteria, and change implications to stakeholders during UAT.
- Managed UAT coordination and business sign-off in a regulated banking environment.

Asia Commercial Bank (ACB) — IT Vendor Mgmt *SIEM / Splunk, eKYC, Security & Compliance*

- Worked with Heads of IT to build and refine vendor evaluation and selection processes.
- Participated in IT sourcing project initiatives, coordinating technical reviews and POC activities.
- Known for keeping business, security, and technical teams aligned on feasibility, risk, and compliance.
- Supported preparation of RFPs, MoU, and SLA to align scope and responsibilities.
- Reported directly to the CIO, presenting vendor assessments and POC outcomes to support decisions.

GFT Technologies — Business Analyst *Digital Banking – Payments, AML, Card Systems*

- Contributed to digital banking initiatives across payments, AML, card systems, and API-based integrations.
- Worked with Product Owners, internal stakeholders, and multiple agile squads to clarify requirements and align backlog priorities.
- Analysed cross-team dependencies, delivery risks, and end-to-end payment flows.
- Communicated options, impacts, and trade-offs to support scope and release decisions.
- Supported UAT and release readiness in an agile delivery environment.

JACCS Finance / FE Credit — Business Analyst *Finacle Core Banking, PEGA Loan Origination System*

- Collaborated with business stakeholders to understand lending processes and change requests.
- Clarified system behavior through discussions with vendors and internal IT teams.
- Assisted in evaluating solution options and implementation impacts.
- Managed UAT planning, execution, and business approval.
- Provided post-release support during stabilisation and issue resolution.
