- Vendor coordination & negotiation

LANGUAGE

English / Vietnamese / Finnish (A2)

About Me

I am a Business Analyst / IT Consultant with 10 years of experience in banking and financial services, working across retail banking, digital banking, consumer finance, and capital markets.

I work closely with business stakeholders, internal clients, vendors, and IT teams to clarify needs, align expectations, and support practical decisions. I am known for clear communication, structured facilitation, and confident presentations across requirements, UAT, and go-live in regulated environments.

WORK EXPERIENCE

BA Experience – Banking & Financial Services

Cross-functional Banking Programs 2016 – 2023

(Asia Commercial Bank, GFT Technologies, FE Credit, JACCS Finance, N2N-AFE)

- Created shared understanding between business users, IT teams, and vendors by clarifying requirements, assumptions, and constraints across analysis and delivery phases.
- Structured discussions and working sessions to surface hidden rules, edge cases, and risks embedded in complex banking systems.
- Helped stakeholders navigate UAT and release decisions by explaining system behavior, impacts, and trade-offs in regulated environments.

Selected Banking & Finance Roles

Asia Commercial Bank (ACB) – Business Analyst *Asset Valuation & Collateral Appraisal Systems*

Context:

Asset valuation and collateral appraisal rules were fragmented across departments, making it difficult to translate business intent into consistent system logic under banking regulations.

- Clarified valuation rules and appraisal logic through structured discussions and scenario-based analysis with business users.
- Translated business intent into functional specifications that IT teams and vendors could implement consistently.
- During UAT, reconciled differences between business expectations and system behavior by explaining impacts, acceptance criteria, and compliance implications.
- Enabled informed business sign-off by highlighting risks, edge cases, and regulatory considerations.

Asia Commercial Bank (ACB) – IT Vendor Mgmt *SIEM / Splunk, eKYC, Security & Compliance*

Context:

Senior IT leadership required clarity to compare security and compliance vendors while balancing regulatory risk, technical feasibility, and long-term maintainability.

- Collaborated with IT department heads to establish an end-to-end vendor management and evaluation process, including standardized templates and automated scoring.
- Defined vendor evaluation criteria with Heads of IT and security stakeholders, aligning technical capability, compliance, and risk considerations.
- Coordinated technical reviews and proof-of-concept activities to assess vendor solutions against operational and regulatory requirements.
- Synthesized findings into structured comparisons, highlighting trade-offs between cost, risk, and implementation complexity.
- Presented assessment outcomes to the CIO, narrowing vendor options and enabling final sourcing decisions under regulatory constraints.

GFT Technologies – Business Analyst *Digital Banking – Payments, AML, Card Systems*

Context:

Digital banking initiatives involved multiple agile squads, complex system dependencies, and frequent scope and release trade-offs.

- Clarified requirements with Product Owners and stakeholders across payments, AML, and card system domains.
- Analyzed end-to-end flows and cross-team dependencies to identify delivery risks and integration impacts.
- Communicated options, constraints, and trade-offs to support backlog prioritization and release planning.
- Helped align business expectations with delivery realities during UAT and release readiness.

JACCS Finance / FE Credit — Business Analyst

Finacle Core Banking, PEGA Loan Origination System

Context:

Lending platforms required frequent changes while maintaining system stability and regulatory compliance.

- Clarified lending processes and change requests through discussions with business stakeholders.
- Worked with vendors and internal IT teams to explain system behavior and implementation implications.
- Assisted stakeholders in comparing solution options and understanding operational impacts.
- Coordinated UAT activities and supported business approval and post-release stabilization.

N2N – AFE (Hong Kong) — Business Analyst/IT Coordinator

Capital Markets – Securities Trading Systems

Context:

Securities trading projects demanded close coordination between client users and offshore delivery teams under tight testing and go-live timelines.

- Clarified trading workflows and operational requirements directly with client users.
- Coordinated communication between offshore development teams and business users during testing and UAT.
- Managed issue clarification and acceptance discussions to maintain delivery momentum.
- Supported go-live preparation and early production stabilization where operational accuracy was critical.

Implementation & Delivery Experience

Cadena — Implementation Consultant

2015

HR, Payroll & Time Attendance Systems

Context:

Clients required rapid implementation of HR and payroll systems aligned with local operational practices.

- Led requirement workshops and configuration discussions to align system setup with business needs.
- Coordinated implementation activities across client and delivery teams to keep timelines on track.
- Delivered end-user training and guided clients through go-live and stabilization phases.

CMS — Implementation/Support Consultant 2008 - 2010
Securities Trading – Front & Back Office

Context:

Trading platforms required close client engagement during rollout and early production phases.

- Engaged with client users to understand trading workflows and daily operational requirements.
- Conducted system demonstrations and user training for front and back office teams.
- Served as the primary point of contact for operational questions and issue escalation.
- Participated in UAT, go-live activities, and post-production stabilization.

Process & Product Analysis Experience

Home Credit — Process Analyst 2012 - 2014
Consumer Finance – Lending & Operations

- Consumer Finance – Lending & Operations
- Analyzed and mapped end-to-end lending and operational processes using BPMN.
- Identified process gaps and inefficiencies based on operational and business requirements.
- Produced process documentation to support approvals and system improvement initiatives.

ANZ Bank — Product / Process Analyst 2010 - 2012
Wealth Management & Investment Products

- Analyzed investment product processes with Relationship Managers and Product Managers.
- Translated product logic into process and calculation flows using BPMN.
- Acted as user representative, coordinating requirements, test cases, and UAT activities.
